

INVESTOR PLATFORM

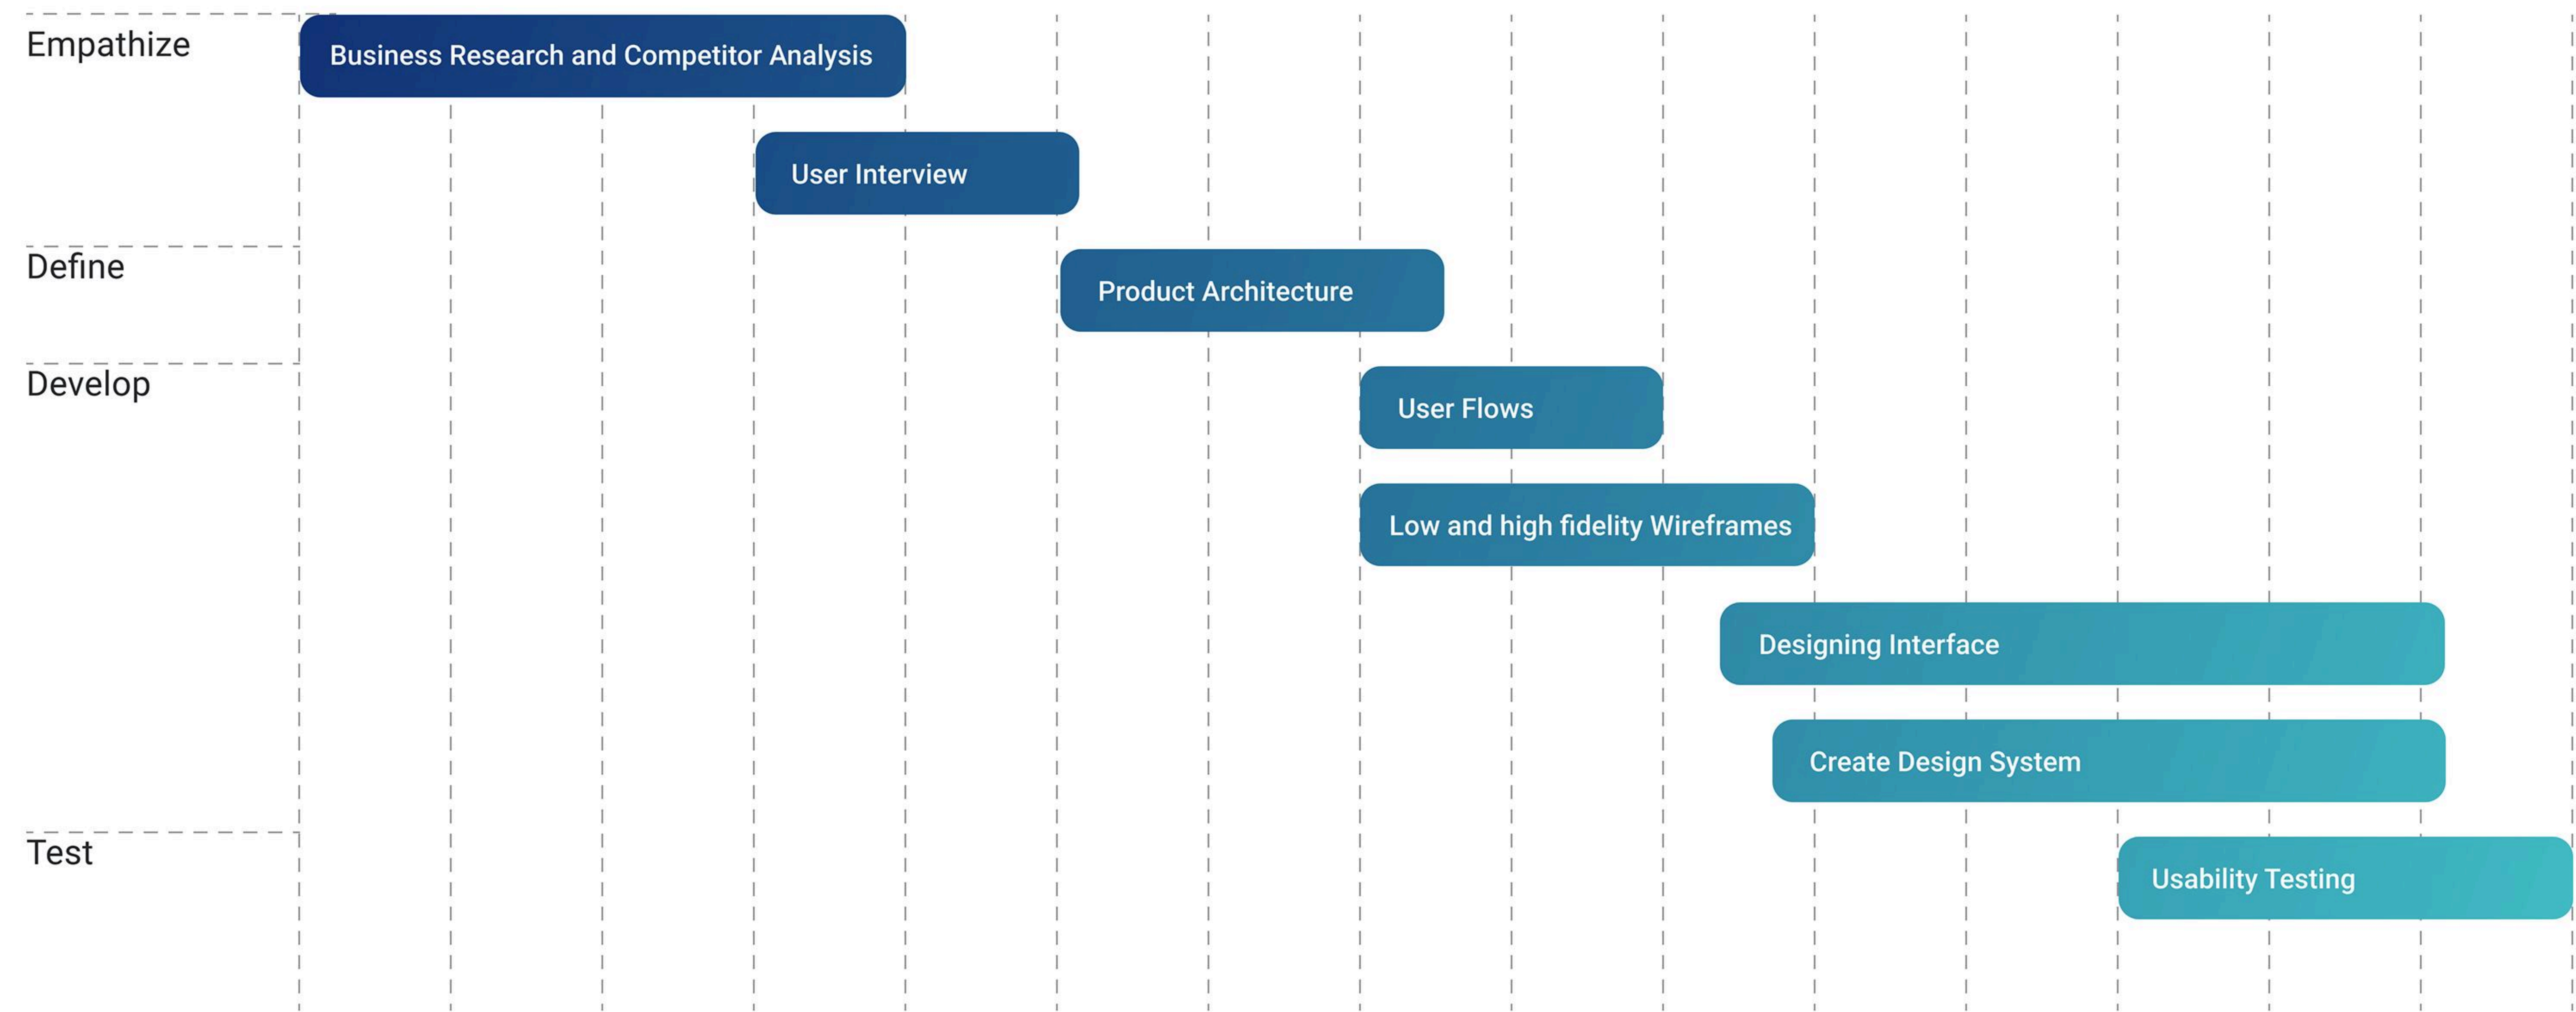

Peer-to-Peer Lending Platform for Accredited Investors

Platform link: [IOS app](#) | [Android app](#) | [Web app](#)

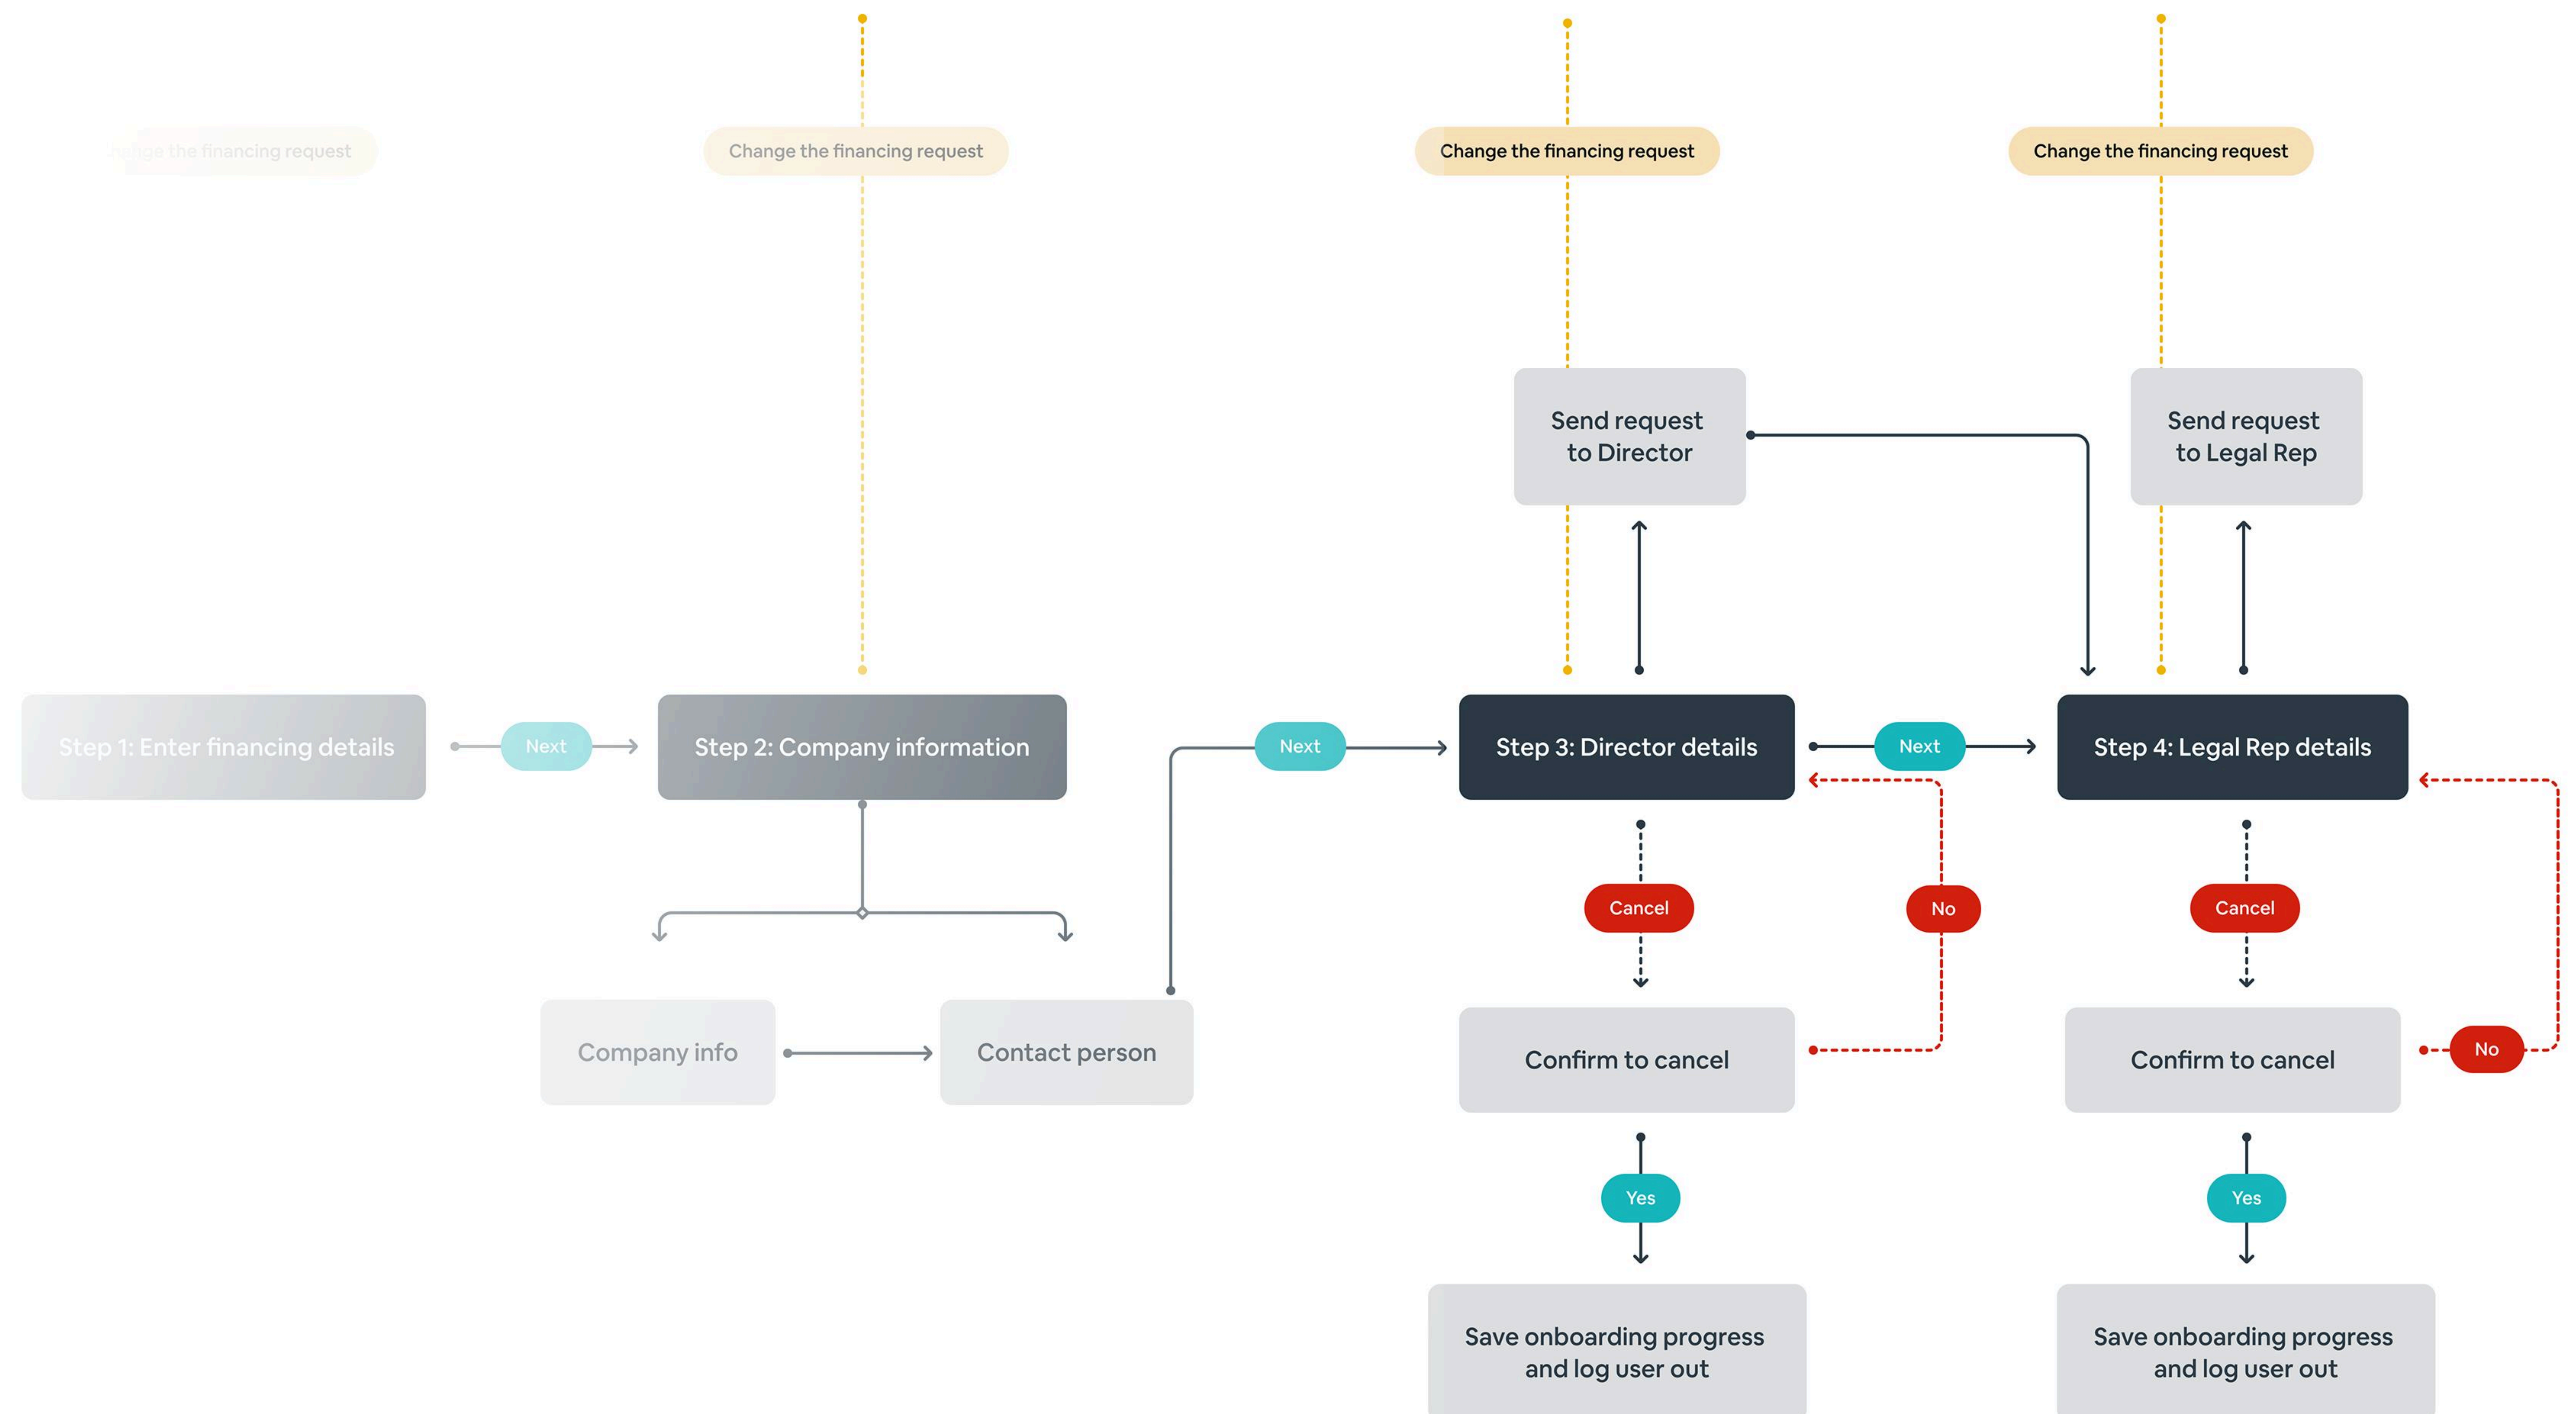

Design Process

Define a roadmap to start development in an agile manner.

User flows

Build the optimized architecture, that allows reaching goals highly-aligned with all other users of the platform.

Low-fidelity wireframe

Wireframe represents the design skeleton and depicts every detail of the final product.

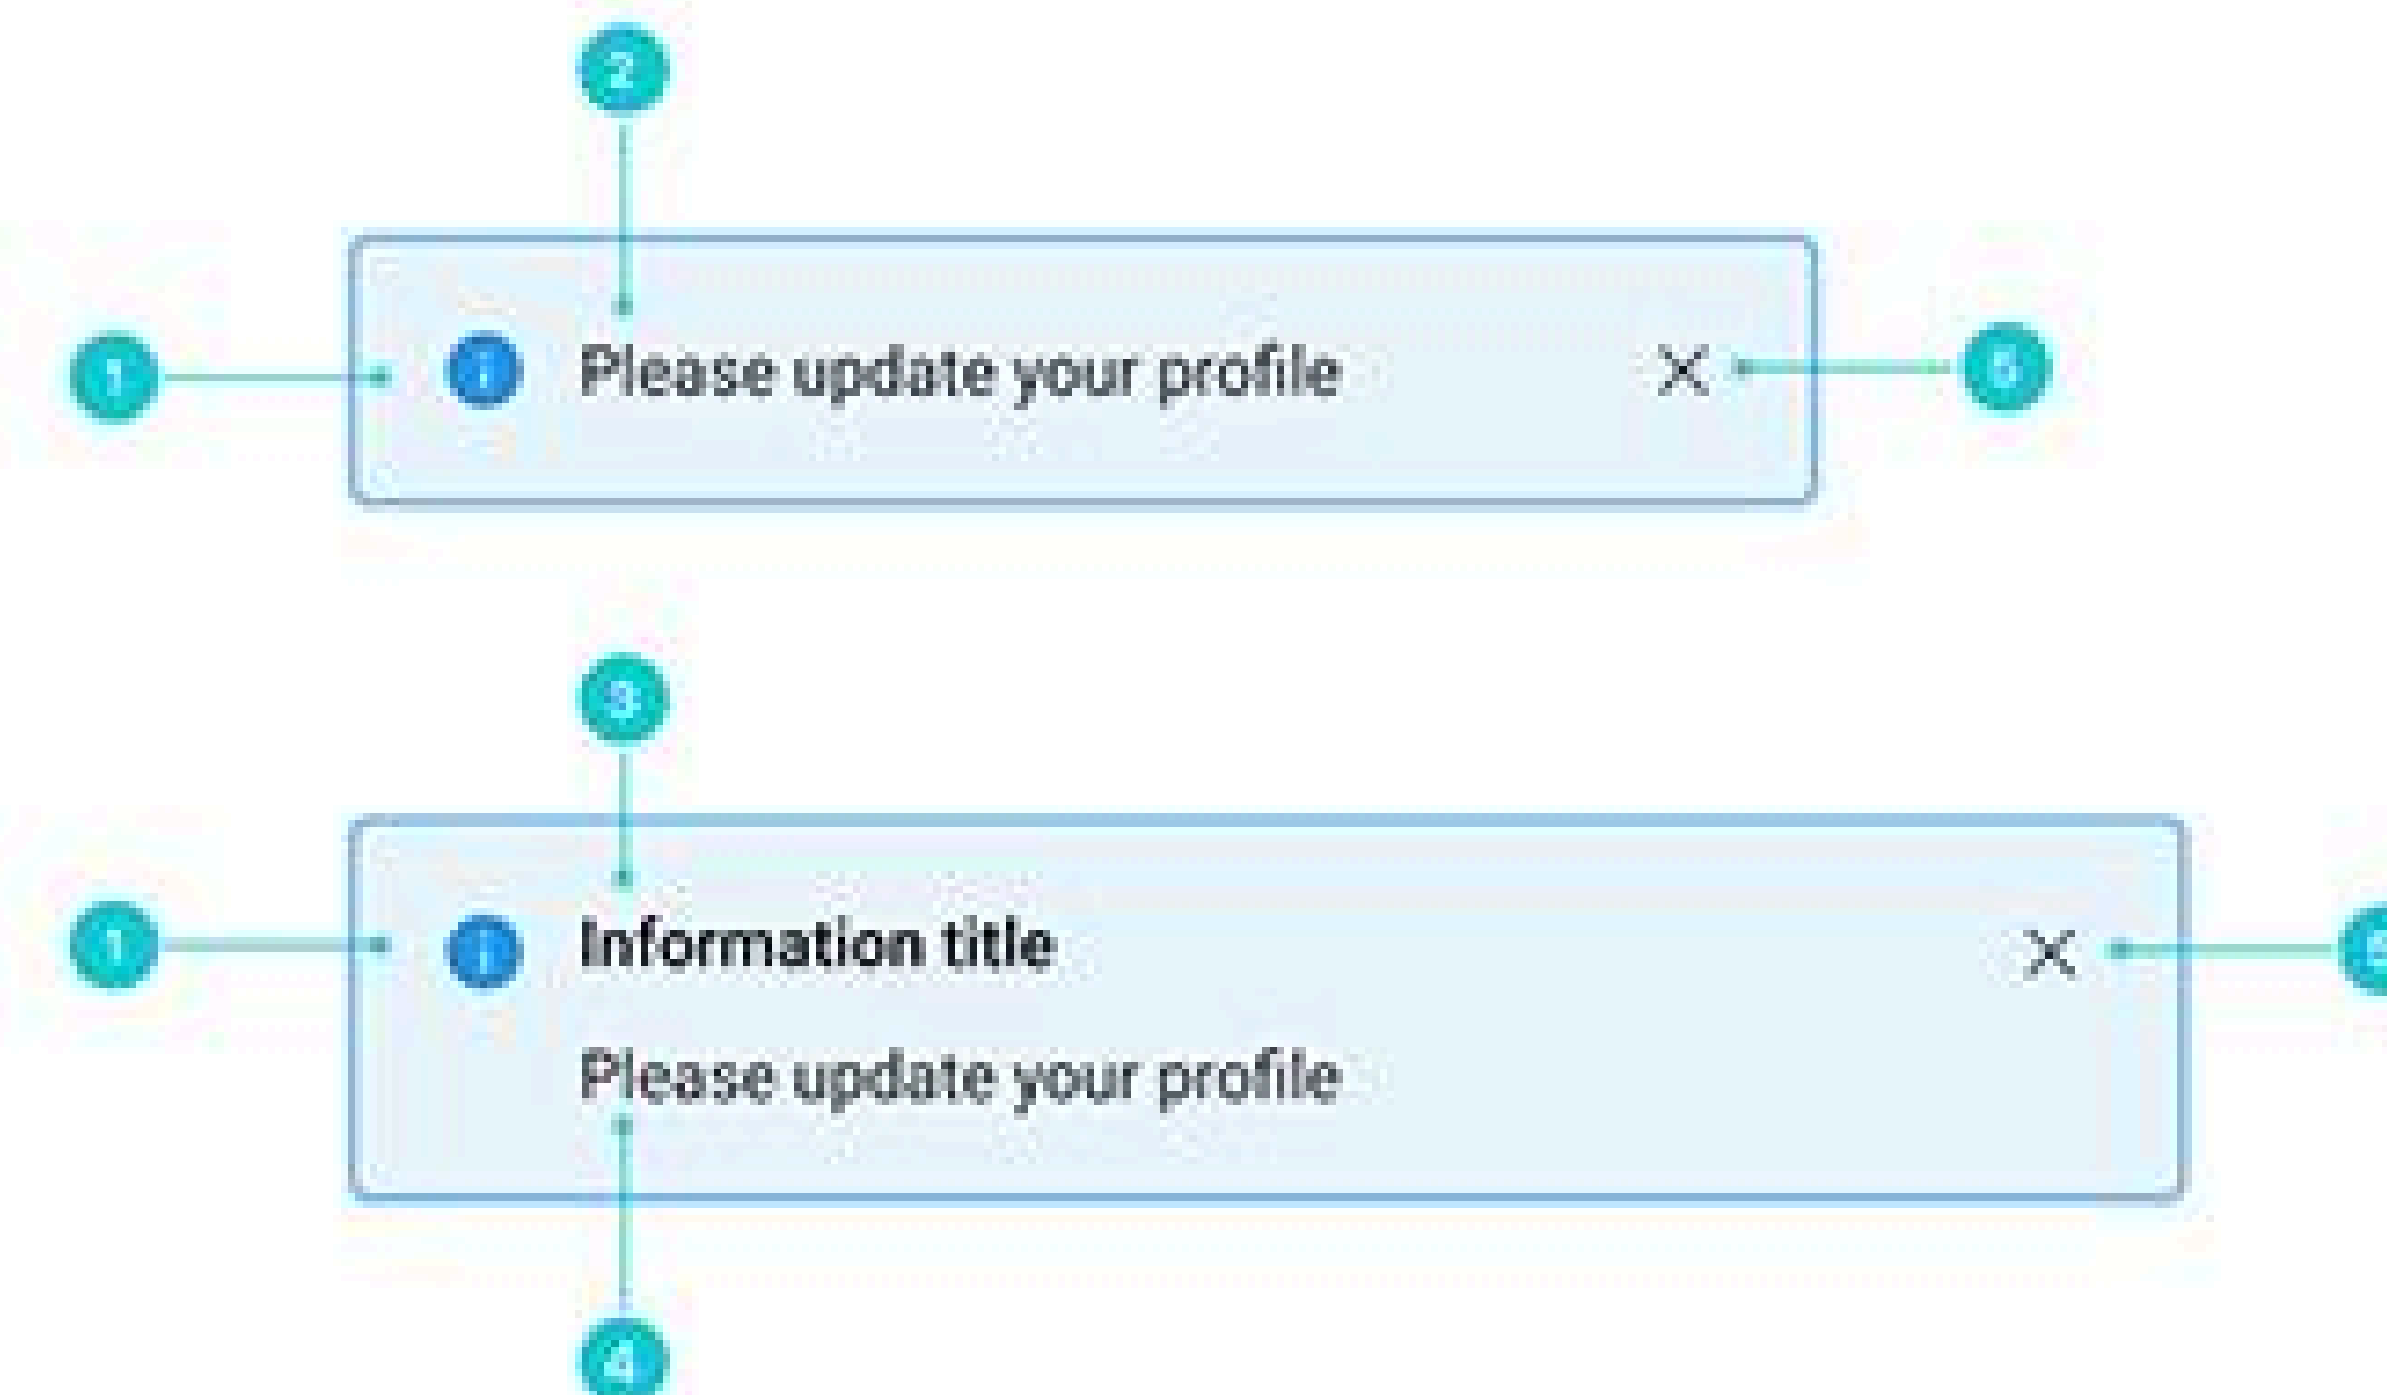

Design system

This UI design system was created for the new platform and needs to be standardized for growing and appending new features.

Alerts

Usage

Use notifications to inform users of important status changes and updates. They should be relevant to the user and as minimally disruptive as possible. There are two major use cases for notifications: task-generated and system-generated.

(1) Icon & background color

It indicates the message type

(2) Messages without title

This should describe the issue the user needs to know

(3) Title

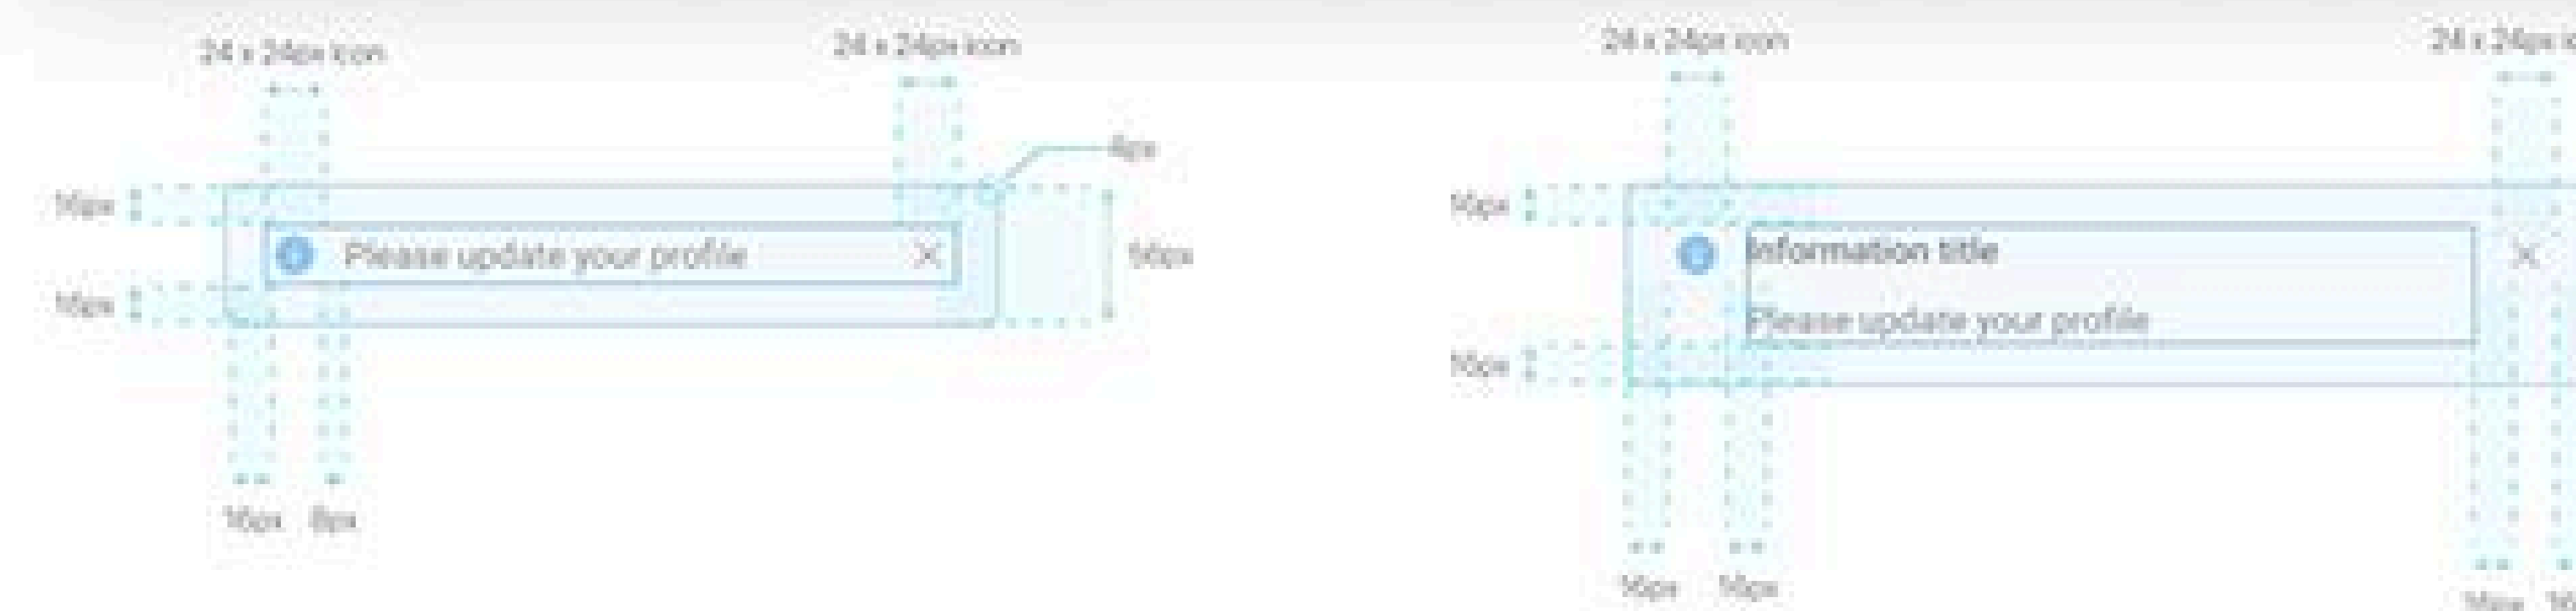

Titles should clearly and concisely indicate the purpose of the message

(4) Description

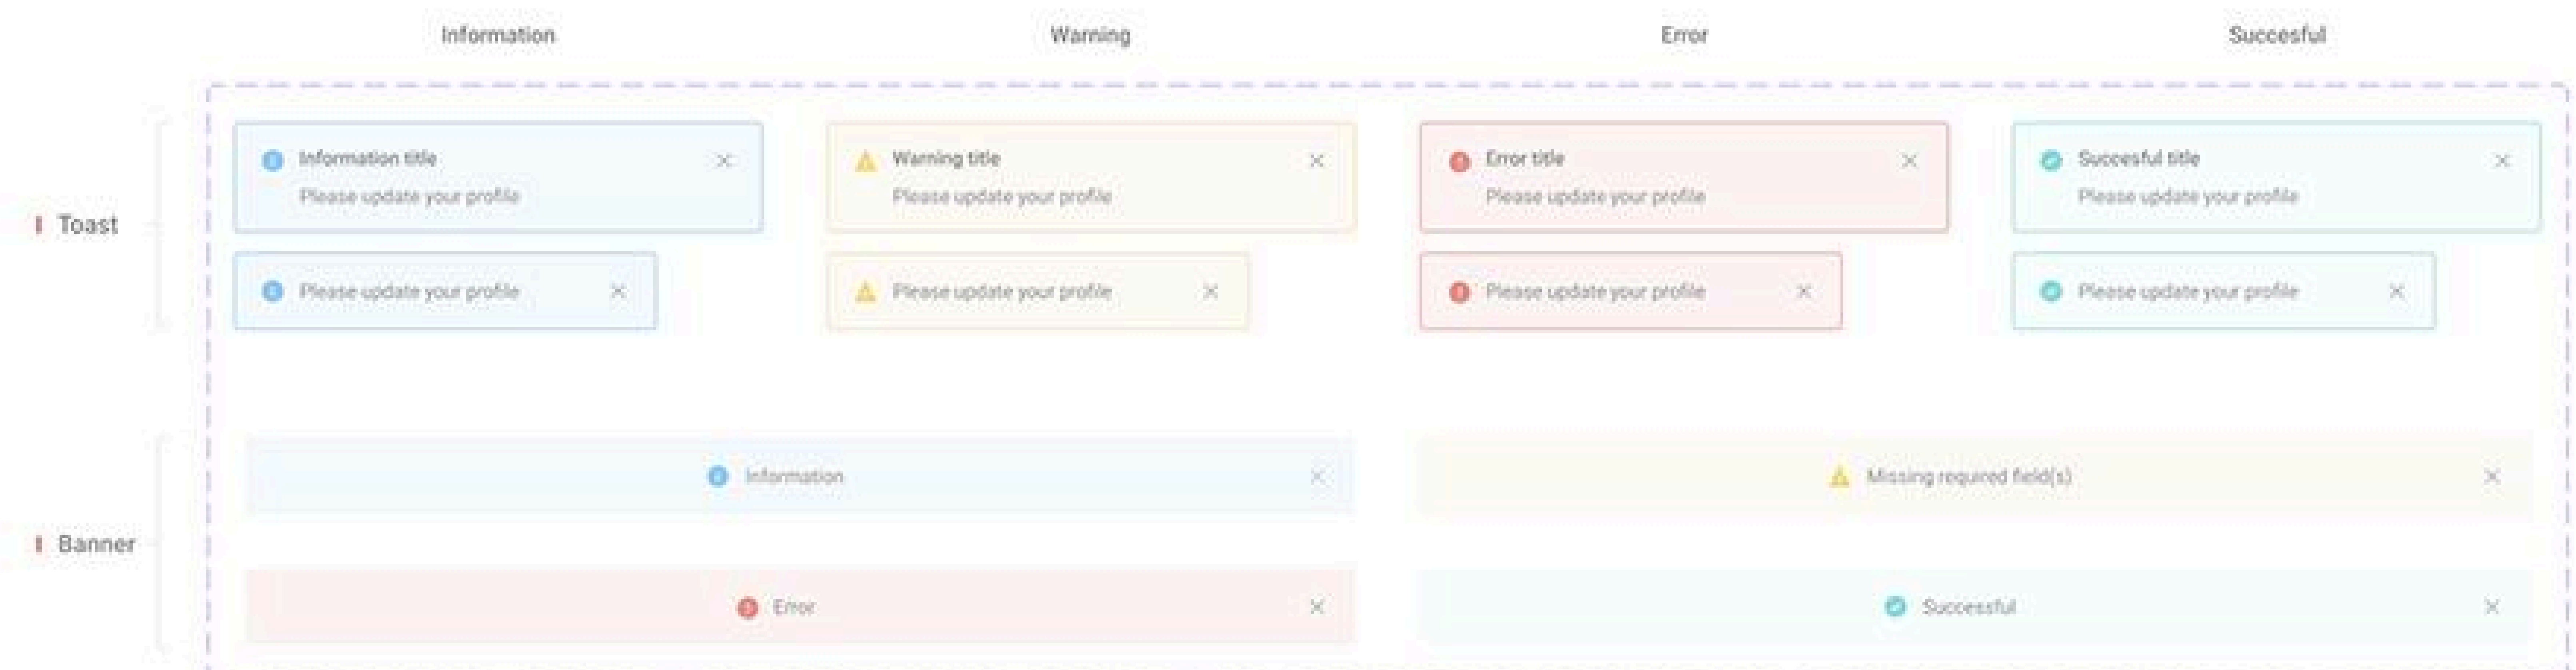

This should describe the issue the user needs to know

(5) Close icon

Users can click on it to close the messages

Variable components

Fast Identification & onboarding

Separate user types to Investor and Borrower base on the main purpose. Registration is for free and takes less than 10 minutes.

Get started

Register now and complete your online application to get an approval decision in 48 hours.
